Renew New Mexico Conference to be Held April 2-3 in Tucumcari

SANTA FE, NM – The New Mexico Rural Alliance, the New Mexico Economic Development Department (NMEDD) and the New Mexico Economic Development Partnership (NMEDP) today announced that the Renew New Mexico Conference highlighting renewable energy development in New Mexico will take place April 2-3 in Tucumcari.

The Conference will be held at the Tucumcari Convention Center, 1500 West Historic Route 66 (Tucumcari Boulevard), and will include speakers on wind, solar and biomass energy and networking opportunities with experts from utilities, government and the private sector.

“New Mexicans have great potential to produce energy from renewable sources utilizing technologies and equipment already available,” said Fred Mondragón, NMEDD Cabinet Secretary. “The conference will offer insight into the evolving energy market and present growth strategies to entrepreneurs, landowners, farmers, ranchers, dairy producers, counties, municipalities, schools and all other interested parties.”

The conference program will consist of break-out and plenary sessions that will present a wide range of information to encourage thoughtful evaluation and discussion regarding the development of wind, solar and biomass energy in the State of New Mexico.

Sessions will be designed to be interactive and provide ample time for audience participation. Events will be geared to provide the opportunity for participants to network and share ideas. Speakers and moderators have been invited because of their experience and expertise in renewable energy.

“I believe this conference is critical to the future development of a stable and successful renewable energy industry in New Mexico,” said NMEDP Chairman Raymond Mondragon. “I encourage businesspeople and anyone with a stake in the future of this burgeoning industry to take part.”

For more information, including a tentative program, or to register, visit www.renewnm.com or call (575) 461-4079.
